Examiner's Amendments / Reasons for Allowance

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the Claims

The Claims shall be amended as follows:

Claim 1

Computer implemented method for producing and/or updating learning examples stored as random test samples, for optimization of automatic optical reader of inscriptions on mail with adaptive classifiers, using the following steps:

- reading out the content of wireless-readable, and describable electronic memory units located on or in the mail item with automatic optical reading of related inscriptions;
- if destination address information is identified and read from a memory unit, storage of said information as destination address data, together with captured image of the surface of the mail item in a random test sample database to optimize the automatic optical reader.

Claim 2

Method according to claim 1, wherein if a predetermined number of automatically created entries in the random test sample database is achieved and/or if a fixed time interval has been exceeded since the previous optimization, automatic optical reader optimization is initiated.

Claim 3

Method according to claim 1, wherein the storage units are RFID-tags/transponders.

Art Unit: 2129

Claim 4

Method according to claim 1, wherein when the address information is provided in coded form, the address text is automatically determined from an address dictionary comprising all the variants thereof and such address is entered into the random test sample database.

Claims have been amended to comply with the requirements of *In re Bilski*, 545 F.3d 943, 88 USPQ2d 1385 (Fed. Cir. 2008) and to clearly identify the limitations of the invention.

Reasons for Allowance

2. Claims 1-4 are considered allowable since when reading the claims in light of the specification (MPEP § 211.01), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim including “learning examples stored as random test samples”, (supported at e. g., page 6, lines 21-26), “optimization of automatic optical reader” (supported at e. g. page 7, lines 13-17), “adaptive classifiers” (supported at e. g. page 6, lines 21-26), “wireless-readable and describable electronic memory” (supported at e. g. page 6, line 29), “destination address data” (supported at e. g. page 8, line 11), “random test sample database” (supported at e. g. page 7, lines 6-7) wherein wireless-readable electronic memory units located on or in the mail item are read and the data indicating the destination address is stored together with the captured image of the surface of the mail item to generate random test samples to optimize automatic optical readers.

The closest prior art (Schafer et al, USPN 6,993,155) teaches a method for reading a document using intermediate steps to support classification of segmented results such that when clearly ascertained result in a current random sample used to readapt the automatic reader.

An alternative prior art (Monico, USPN 6,557,758) teaches direct to package printing system with RFID write/read capability.

An alternative prior art (Johannes, DE 69603614T) teaches a system for reading package information that includes an imaging system and a label decoding system.

However, Schafer, Monico and Johannes do not teach using wireless-readable electronic memory units located on or in the mail item to read destination address and such data indicating the destination address is stored together with the captured image of the surface of the mail item to generate random test samples to optimize automatic optical readers.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this information or related to the subject disclosure
